

Ariel Mundo Ortiz

Postdoctoral Fellow

Département de médecine sociale et préventive and CReSP, Université de Montréal

✉ aimundo.ortiz@gmail.com ☎ +1 438 875 9203 🌐 aimundo.rbind.io | Updated: Nov. 13, 2023

Education

University of Arkansas, PhD. Biomedical Engineering May 2022
Universidad Rafael Landivar (Guatemala), B.S. Chemical Engineering (*cum laude*) 2009

Research Experience

Postdoctoral Fellow, Département de médecine sociale et préventive et au centre de recherche en santé publique (Université de Montréal, Montreal, QC) July 2022-Present

Working at the Nasri Lab at the School of Public Health (ESPUM) doing research in infectious disease modelling, including mpox and COVID-19. Duties include writing, editing, and revising academic manuscripts, doing literature searches, collaborating with different research groups, contributing to ongoing grant projects from the lab, writing code to clean and analyze data (in R), using version control software (Git) for collaborative projects. First year of postdoctoral training was supported by a CRM-MfPH fellowship.

Postdoctoral Fellow (University of Arkansas, Fayetteville, AR) May 2022-July 2022

Worked at the Translational Biophotonics and Imaging Laboratory in de Department of Biomedical Engineering to analyze longitudinal optical and molecular data.

Graduate Research Assistant (University of Arkansas, Fayetteville, AR) Aug 2017- May 2022

Designed and executed experiments in a mouse model of colon cancer using optics and molecular biology techniques to quantify changes in perfusion and gene expression in response to therapy. Implemented Statistical semi-parametric models (generalized additive models) to analyze longitudinal data.

Developed research questions, collected data, wrote, edited, revised and submitted deliverables that were product of the performed research (academic manuscripts, conference presentations, talks). Writing duties included as well a grant proposal in collaboration with the main supervisor, and PhD dissertation.

Laboratory work included to be in charge of small animal experiments (health monitoring, chemotherapy administration, injections, endpoint euthanasia, tissue collection, biopsy collection in-vivo), use of custom optics equipment (spectrometers, fiber-bundle probes), qPCR, white light microscopy, cell culture, DNA extraction and RNA purification.

Additionally, performed teaching assisting duties for two courses (Biomedical Instrumentation, and Design of Biomedical Experiments). In both instances duties included the inventory of laboratory materials, updating laboratory manuals, assiting students during the laboratory experience, grading, and reporting and communicating with Faculty through the duration of the course.

Other Relevant Experience

Universidad Rafael Landivar

Teaching Assistant Professor 2016-2017

Professor of Chemistry at the Environmental and Agricultural Sciences Department. Duties included developoing lectures, laboratory supervision, student mentoring, updating laboratory manuals to reduce expenses and minimize ecological impact, and communicating with faculty.

Adjunct Professor 2013-2017

Taught Introductory Chemistry in the Engineering, Environmental and Agricultural, and Health Sciences Departments. Duties included developoing lectures, laboratory supervision, student mentoring, updating laboratory manuals to reduce expenses and minimize ecological impact, and communicating with faculty.

Lacteos Balcanicos Glad

Assistant Plant Engineer 2012

In charge of the production of the main product (yogurt, \approx 3000 L per week). Duties included personnel supervision, material inventory, production scheduling, quality control reporting.

model.” In Label-free Biomedical Imaging and Sensing (LBIS) 2019, vol. 10890, p. 108901L. *International Society for Optics and Photonics*, 2019.

Awards and Recognition

Fields Institute: Mathematics for Public Health Festival (MfPHFest) October 2022

Received funding to attend the MfPHFest conference and present postdoctoral work done in the field of Statistics. (CAD 1,500)

Centre de recherches mathématiques (CRM) MfPH-CRM Postdoctoral Fellowship July 2022

Received postdoctoral fellowship for one year to analyze public health and behavioral data (CAD 50,000)

BME Rising Scholar June 2022

Selected by the committee of the BME Scholars Program at Washington University in St. Louis to receive mentorship about pathways and professional success in academic careers. Award included paid travel, conference attendance and honorarium.

Professional Awareness, Advancement, and Development (PADD) Scholar 2020-2021

Received funding and participated in the PAAD program to supplement my graduate education in persuasive speaking, commercialization, and data science (USD 1,500).

OMNI Endowed International Scholarship 2020

Granted as a scholar fulfilling the mission of the OMNI Center in Fayetteville (USD 500)

Fulbright Faculty Development Scholarship 2017-2019

Scholarship covered all costs of my PhD for the first two years. Only two scholarships awarded for that period in the whole country. (USD 78,000)

Grants

Canada Institutes of Health Research (CIHR) 2023

Co-investigator in the grant “epidemiological modelling of behavioural impact on mpox mitigation strategies” lead by Prof. Nasri from Université de Montréal. Involved in the writing of the grant proposal, performing literature review, communicating with team members, and revising the final grant draft. Funding secured: CAD 412,000. Record of the grant can be found in the [CIHR funding decision database](#).

Arkansas Biosciences Institute 2021 seed grant competition 2021

Main author on a proposal co-submitted with Dr. Timothy Muldoon to examine gene expression and optically derived markers in a mouse model of colorectal cancer. Funding secured: USD 30,000. The proposal scored in the top 2 of all the individual research projects for the cycle.
